

BULLETIN: Pressure Switch Installation

May 25, 2012

Subject: Installation of pressure switch as required by ASME A17.1 sec. 3.26.8 and CSA B44 sec. 3.26.8 on Maxton Hydraulic Control Valves.

To whom it may concern,

Installation of a pressure switch in either "S" Port or "B" Port on Maxton Control Valves is in compliance with the code requirements under section 3.26.8 of A17.1 and CSA B44 as these ports are direct and unrestricted connections to the flow and pressure of the "line between the cylinder and the valve". These ports are on the jack side of the check valve which is the "valve" referred to in the wording of the section of code.

Sincerely,
MAXTON MANUFACTURING COMPANY
